DAHUA TECHNOLOGY USA UNVEILS LATEST HD ANALOG DVR

HDCVI 3.0 DVR Offers Penta-brid Support and Smart H.264 Compression

IRVINE, Calif., October 6, 2016 – Dahua Technology, a high-value, total security solutions provider, will showcase its next-generation 8-Channel HDCVI 3.0 DVR.

Now featuring Penta-brid compatibility with support for the five most popular industry standards—IP, CVI, Analog, AHD, and TVI—the Dahua DH-XVR71A08H also offers Smart H.264 codex dual-stream video compression to save up to 50 percent bandwidth and storage.

HDCVI 3.0 by Dahua is a technology that breathes new life into aging analog video surveillance systems, bringing HD quality video and IP functionality to long distance transmissions over coax cable. With simple plug-and-play installation, HDCVI 3.0 offers exceptional value by offering broad compatibility with many technologies. This includes intelligent functions comparable to those available in IP systems and higher resolutions, such as Ultra HD (UHD) or 4K.

“One of the biggest challenges of converting analog systems to HD is the variety of platforms found in older coax systems,” said Tim Wang, CEO, Dahua Technology USA. “Dahua’s latest generation HDCVI 3.0 DVR addresses this problem for a streamlined open-source solution that integrates with the most widely-used technologies on the market.”

The Dahua DH-XVR71A08H features all channel 1080P/720P real-time recording, HDMI/VGA simultaneous video output, 1/4/9 channel synchronous real-time playback, GRID interface & smart search. It supports multi-brand network cameras with ONVIF Version 2.4 conformance, 3D intelligent positioning with Dahua PTZ dome camera, and 1 SATA HDD up to 6TB, 2 USB2.0.

“Dahua is the industry trailblazer in HD Analog technology, so it’s great to announce a flexible, next-generation HDCVI 3.0 DVR that will help organizations breathe new life into existing coax systems,” said Wang.

About Dahua Technology USA

Dahua Technology USA brings high-value, total security solutions to the North American market by focusing on integrity and personal relationships to enhance the customer experience. With the world's second-largest market share, according to a 2015 IMS report, Dahua's surveillance solutions, from award-winning cameras to video management software, deliver unparalleled quality, reliability, and stability. Dahua Technology USA headquarters and warehouse are located at 23 Hubble, Irvine, California, providing sales and support throughout the U.S. and Canada.
